Metal Cutting

Junior/Mini Hack

Les scies Pégas® sont fabriquées en Suisse à partir des meilleurs aciers au carbone disponibles, traitées thermiquement après l'usinage des dentures, seule méthode permettant de garantir une dureté et une flexibilité optimale.

Pégas® saws are manufactured in Switzerland from the best available carbon steels. They are heat-treated after machining the teeth, this being the only method for guaranteeing toughness and optimum flexibility.

Die Sägeblätter Pégas® werden in der Schweiz aus den besten verfügbaren Kohlenstoffstählen gefertigt und nach der Herstellung der Zahnung einer Wärmebehandlung unterworfen, was die einzige Methode ist, um eine hohe Härte und optimale Biegsamkeit zu erhalten.

Las sierras Pégas® se fabrican en Suiza con los mejores aceros al carbono que existen. El tratamiento térmico es realizado luego del maquinado de los dientes, único método que permite garantizar una óptima dureza y flexibilidad.

## Metal Cutting

These are high quality blades for precise cutting of thin metals up to .125 inch (3 mm) thick and for other hard, nonmetallic materials. They are specifically heat treated to give maximum performance with power scroll saws. Can be used in hand frames also.  
(Reference = 12x / Reference + B = 12x12 [1 gross])

## Junior/Mini Hack

For use in hand frames that require pinned end blades. Will cut a broad range of materials including ferrous and nonferrous metal.  
(Reference = 12x / Reference + B = 12x12 [1 gross] / Reference + C = 6x)
